Brilliant book

By Constanze Tschritter

I love this book. The characters are more than interesting and the storyline is great and as wonderfully twisty as I've come to expect from this author. It's great fun to read and you just can't put it away.

I need the sequel! Now!

PS: If it helps anyone, my all time favorite authors are Jim Butcher and Robin Hobb. I'm not saying if you like one of them too, you will automatically also like Run to Earth, but yes, chances are good if you love a good fantasy book you'll love this.

Great read by a first time author

By Megan

This review is spoiler free and I won't reveal anything about the plot that isn't in the blurb because one of the great treats of this book is not knowing what's going to happen.

I loved reading SF Mazhar Run to Earth novel. It's the first in a series of four and I cannot wait until the next book is released. One of the biggest praise I can give any novel is that once I finished reading it I wanted more, more, more. This was definitely the case with Run to Earth, waiting for the second book is going to be a hard wait.

There were many things to love about this book but for me the key to a successful story is great characters, and I loved the characterizations in this book. By the end you have a very distinct idea of who all the different characters are and where their place is in the “world”. No two characters appear carbon copies of each other, each with their own voice and personality. These characters aren’t just set pieces to move the plot forward, they are multi-layered and come across as real people, suffering real emotions.

Mazhar creates a world and mythology that feels fresh. There’s realms, weapons, magic (or should I say powers) that is thankfully restrictive and not all powerful, demons/monsters, and hot guys/girls riding around on motorcycles. I could picture everything so clearly in my mind and it flowed so well that it was like a movie playing in my head.

This is not a stand alone book. It is very much Act 1 of a larger story. If you require action in every chapter, and a plot that moves at break neck speed then this isn’t the novel for you. This book is a slow burn, and I mean that as a compliment. It takes it’s time to develop it’s characters and set up the world. The author is laying the ground world, and some of the things that are being set up in this book might not be paid off until book 3 or 4.

Anyone who is familiar with Mazhar’s writing will know that not everything is as it seems. I thought I knew where this story was going, then BAM an event happened and now I have NO idea where this is going, and that really excites me.

This book isn’t perfect. There’s the occasional awkward info dump, it lags a tiny bit in the middle and the main character suffers a little bit from being the audience’s view point into the world, as everything we need to know about he has to learn too. But all of these things are minor, and the good far far far outweighs the bad.

I rate my books on how I feel at the end of reading them. This book had me so excited and amazed at the end. I am still on a story high more than 12 hours after finishing the book. I can’t remember the last book I read where I just had to sit and think about everything that had happened afterwards. I’m still thinking about it and have wild theories rolling around my head. I want lots of people to read this book just so I can have conversations with others about it.

It’s a solid 5 star read for me. I read a lot of YA books and this is best YA read I’ve had in a while.

A great YA fantasy book!

By Lena Hennigs

I was hooked on this story after I read the first paragraph and I could barely put it down. I really enjoyed the plot with all it turns and twists and I can only recommend the book! I’ve finished it a while ago and I’m still thinking about it and what’s going to happen next. I’m so excited about the next part! I’m looking forward to it so much!

The characters are all very well written and well developed. Not one of them lacks depth. Their emotions seem so real that you’re just feeling with the characters. I love how they grow so much in such a short period of time but it doesn’t seem forced at all!

I liked that even through it’s a fantasy world there are certain aspects that connect it to our world – you can imagine it really happening that way. I thought the whole “world” was really well introduced with lots of background information which I didn’t find boring at all.

The story includes so many things: war, romance, family, friendship, trust, lots of (really great written) fights, nice and bad guys. All relationships are so unique, not every friendship and family bond feels the same: you can see how different characters feel differently and act differently with each other. I really love that aspect of it!

You just feel how much hard work and passion went into the whole story!
