THE COSMIC PERSPECTIVE: STARS, GALAXIES, AND COSMOLOGY (6TH EDITION) BY JEFFREY O. BENNETT, MEGAN O. DONAHUE, NICHOLAS SCHNEIDER, MARK VO PDF

When you are rushed of task deadline as well as have no idea to obtain inspiration, **The Cosmic Perspective: Stars, Galaxies, And Cosmology (6th Edition) By Jeffrey O. Bennett, Megan O. Donahue, Nicholas Schneider, Mark Vo** book is among your options to take. Book **The Cosmic Perspective: Stars, Galaxies, And Cosmology (6th Edition) By Jeffrey O. Bennett, Megan O. Donahue, Nicholas Schneider, Mark Vo** will give you the appropriate resource as well as thing to get motivations. It is not just regarding the jobs for politic business, administration, economics, as well as various other. Some ordered tasks to make some fiction works likewise require inspirations to get over the task. As just what you require, this **The Cosmic Perspective: Stars, Galaxies, And Cosmology (6th Edition) By Jeffrey O. Bennett, Megan O. Donahue, Nicholas Schneider, Mark Vo** will possibly be your option.

About the Author

Jeffrey Bennett

Jeffrey Bennett holds a B.A. (1981) in biophysics from the University of California, San Diego, and an M.S. and Ph.D.(1987) in astrophysics from the University of Colorado, Boulder. He has taught at every level from preschool through graduate school, including more than 50 college classes in astronomy, physics, mathematics, and education. He served 2 years as a visiting senior scientist at NASA headquarters, where he created NASA's "IDEAS" program, started a program to fly teachers aboard NASA's airborne observatories (including the hopefully soon-to-be-flying SOFIA), and worked on numerous educational programs for the Hubble Space Telescope and other space science missions. He also proposed the idea for and helped develop both the Colorado Scale Model Solar System on the CU-Boulder campus and the VoyageScale Model Solar System on the National Mall in Washington, D.C. (He is pictured here with the model Sun.) In addition to this astronomy textbook, he has written college-level textbooks in astrobiology, mathematics, and statistics; two books for the general public, *On the Cosmic Horizon* (Pearson Addison-Wesley, 2001) and *Beyond UFOs* (Princeton University Press, 2008); and an award-winning series of children's books that includes *Max Goes to the Moon*, *Max Goes to Mars*, *Max Goes to Jupiter* (coming soon), and *Max's Ice Age Adventure*. When not working, he enjoys participating in masters swimming and in the daily adventures of life with his wife, Lisa; his children, Grant and Brooke; and his dog, Cosmo. His personal Website is www.jeffreybennett.com < <http://www.jeffreybennett.com/> > .

Megan Donahue

Megan Donahue is a professor in the Department of Physics and Astronomy at Michigan State University. Her current research is mainly on clusters of galaxies: their contents-dark matter, hot gas, galaxies, active galactic nuclei-and what they reveal about the contents of the universe and how galaxies form and evolve.

She grew up on a farm in Nebraska and received a B.A. in physics from MIT, where she began her research career as an X-ray astronomer. She has a Ph.D. in astrophysics from the University of Colorado, for a thesis on theory and optical observations of intergalactic and intracluster gas. That thesis won the 1993 Trumpler Award from the Astronomical Society for the Pacific for an outstanding astrophysics doctoral dissertation in North America. She continued postdoctoral research in optical and X-ray observations as a Carnegie Fellow at Carnegie Observatories in Pasadena, California, and later as an STScI Institute Fellow at Space Telescope. Megan was a staff astronomer at the Space Telescope Science Institute until 2003, when she joined the MSU faculty. Megan is married to Mark Voit, and they collaborate on many projects, including this textbook and the raising of their children, Michaela, Sebastian, and Angela. Between the births of Sebastian and Angela, Megan qualified for and ran the Boston Marathon. These days, Megan runs, orienteers, and plays piano and bass guitar whenever her children allow it.

Nicholas Schneider

Nicholas Schneider is an associate professor in the Department of Astrophysical and Planetary Sciences at the University of Colorado and a researcher in the Laboratory for Atmospheric and Space Physics. He received his B.A. in physics and astronomy from Dartmouth College in 1979 and his Ph.D. in planetary science from the University of Arizona in 1988. In 1991, he received the National Science Foundation's Presidential Young Investigator Award. His research interests include planetary atmospheres and planetary astronomy, with a focus on the odd case of Jupiter's moon Io. He enjoys teaching at all levels and is active in efforts to improve undergraduate astronomy education. Off the job, he enjoys exploring the outdoors with his family and figuring out how things work.

Mark Voit

Mark Voit is a professor in the Department of Physics and Astronomy at Michigan State University. He earned his B.A. in astrophysical sciences at Princeton University and his Ph.D. in astrophysics at the University of Colorado in 1990. He continued his studies at the California Institute of Technology, where he was a research fellow in theoretical astrophysics, and then moved on to Johns Hopkins University as a Hubble Fellow. Before going to Michigan State, Mark worked in the Office of Public Outreach at the Space Telescope, where he developed museum exhibitions about the Hubble Space Telescope and was the scientist behind NASA's HubbleSite. His research interests range from interstellar processes in our own galaxy to the clustering of galaxies in the early universe. He is married to coauthor Megan Donahue, and they try to play outdoors with their three children whenever possible, enjoying hiking, camping, running, and orienteering. Mark is also author of the popular book *Hubble Space Telescope: New Views of the Universe*.

The Cosmic Perspective: Stars, Galaxies, And Cosmology (6th Edition) By Jeffrey O. Bennett, Megan O. Donahue, Nicholas Schneider, Mark Vo. A work could obligate you to consistently enhance the expertise and also experience. When you have no enough time to enhance it directly, you could obtain the encounter and knowledge from reading guide. As everyone understands, publication *The Cosmic Perspective: Stars, Galaxies, And Cosmology (6th Edition) By Jeffrey O. Bennett, Megan O. Donahue, Nicholas Schneider, Mark Vo* is popular as the home window to open up the globe. It suggests that reading publication *The Cosmic Perspective: Stars, Galaxies, And Cosmology (6th Edition) By Jeffrey O. Bennett, Megan O. Donahue, Nicholas Schneider, Mark Vo* will provide you a brand-new means to discover everything that you need. As guide that we will offer right here, *The Cosmic Perspective: Stars, Galaxies, And Cosmology (6th Edition) By Jeffrey O. Bennett, Megan O. Donahue, Nicholas Schneider, Mark Vo*

There is no doubt that publication *The Cosmic Perspective: Stars, Galaxies, And Cosmology (6th Edition) By Jeffrey O. Bennett, Megan O. Donahue, Nicholas Schneider, Mark Vo* will certainly constantly offer you motivations. Even this is just a publication *The Cosmic Perspective: Stars, Galaxies, And Cosmology (6th Edition) By Jeffrey O. Bennett, Megan O. Donahue, Nicholas Schneider, Mark Vo*; you could find lots of genres as well as types of publications. From delighting to journey to politic, and sciences are all given. As just what we state, right here we offer those all, from famous writers and publisher on the planet. This *The Cosmic Perspective: Stars, Galaxies, And Cosmology (6th Edition) By Jeffrey O. Bennett, Megan O. Donahue, Nicholas Schneider, Mark Vo* is among the compilations. Are you interested? Take it currently. Exactly how is the means? Find out more this article!

When somebody must visit guide stores, search establishment by establishment, rack by rack, it is very frustrating. This is why we supply the book collections in this website. It will relieve you to search the book *The Cosmic Perspective: Stars, Galaxies, And Cosmology (6th Edition) By Jeffrey O. Bennett, Megan O. Donahue, Nicholas Schneider, Mark Vo* as you such as. By looking the title, publisher, or authors of the book you want, you could discover them quickly. Around the house, office, and even in your method can be all best location within net connections. If you wish to download the *The Cosmic Perspective: Stars, Galaxies, And Cosmology (6th Edition) By Jeffrey O. Bennett, Megan O. Donahue, Nicholas Schneider, Mark Vo*, it is quite simple then, since currently we extend the connect to acquire as well as make deals to download [*The Cosmic Perspective: Stars, Galaxies, And Cosmology \(6th Edition\) By Jeffrey O. Bennett, Megan O. Donahue, Nicholas Schneider, Mark Vo*](#) So easy!

THE COSMIC PERSPECTIVE: STARS, GALAXIES, AND COSMOLOGY (6TH EDITION) BY JEFFREY O. BENNETT, MEGAN O. DONAHUE, NICHOLAS SCHNEIDER, MARK VO PDF

Building on a long tradition of effective pedagogy and comprehensive coverage, *The Cosmic Perspective: Stars, Galaxies, and Cosmology*, Sixth Edition provides the most engaging and up-to-date introduction to astronomy for non-science majors. The text provides a wealth of features to help enhance student skill building, including new Visual Skills Check end-of-chapter questions that provide an opportunity for students to test their visual interpretation skills, new Cosmic Context Figures that help students synthesize key concepts and processes, and a new comprehensive visual overview of scale to help students explore the scale of time and space. The Sixth Edition has also been fully updated to include the latest astronomical observations, research, and theoretical developments. The text is supported by the most robust package of instructor ancillaries, and MasteringAstronomy™, the market-leading online tutorial and homework system, has been updated to include a wealth of new content to help students learn and review more efficiently outside of class.

This Volume includes Chapters 1-6, S2-S4, and 14-24 of the main text.

- Sales Rank: #134262 in Books
- Published on: 2009-12-26
- Format: AC-3
- Original language: English
- Number of items: 1
- Dimensions: 10.70" h x 1.00" w x 8.50" l, 2.55 pounds
- Binding: Paperback
- 624 pages

Features

- Does not include MasteringAstronomy Access Code

Do not order from -Daily Deals-. However, the book is good!

By Robert Fishberg

Do NOT order from -Daily Deals-.

They shipped me the incorrect text. I ordered "The Cosmic Perspective: Stars, Galaxies and Cosmology" (ISBN-13: 978-0321642707) but instead they incorrectly sent me "The Cosmic Perspective: The Solar System" (ISBN-13: 978-0321642677). This has really inconvenienced me, as I need the text to study for my college Astronomy course, but now I have to order the correct book from a different seller, and I have to wait for it to arrive while I need to by studying for my course.

On the other hand, the book is good! Real life analogies and well-designed diagrams help you understand tricky abstract astronomy concepts. I recommend it for students (like myself) that have a general high-school science background, but are not science college majors.

***** NOTE: With the 6th edition there are 2 different books. One is "Stars, Galaxies and Cosmology" while the other is "The Solar System" -- and these books have different chapters and contents. Make sure you select the right one you need. *****

Chapters missing in the Cosmic Perspective, fifth edition by Bennett

By Karyl G

I bought The Cosmic Perspective (fifth edition) by Bennett, Donahue, etc., a few months ago, and the entire section of Part 3 from page 208 to 424 is missing. This was the section on our solar system and planets. The book was used, and certainly seemed to be in good condition, but when chapters and sections of a book, particularly a textbook are missing, it is extremely disappointing to say the least.

Awesome!

By banabana

I still cannot believe that I got this book for this cheap price!!! Book condition is awesome and clean, and I got it in a few days! I had to get it early as possible because I have to do my quiz by Tues, and I am glad that I got it on earlier than I expected!! Thanks for an awesome offer!
