Best thing is the cover

By MangoMan

Don't be fooled into thinking this is a book about constructing such wonderful wood fired ovens as the one shown on the cover. Page 10 says it all: "The majority of people who are planning an outdoor entertainment center or an indoor oven for residential use will most likely choose a modular oven because it is easy to install; requires less maintenance, will heat up in a fraction of the time and has proven ideal for home cooking. Modular ovens are the focus of this book and I will explain all the steps involved in building one." Sometimes the best thing about a book IS its COVER. Very disappointing. Shows one basic design based around the "modular oven" and then many fancy, artificial, brick and masonry fire boxes nothing like the picture shown on the cover. Being from Italy doesn't necessarily provide credentials to write a book on "design and construction" so if that's what you're looking for, pass this one by. I'm taking the effort to send this one back; something I rarely do. The description NOT provided with this book just wasted my time.

the ultimate wood fired oven book

By Andrew A. Burda

a primer on both choosing and building a precast oven. Only a couple of recipes. Was disapointed.
